The **Man Cave** is that personal space where a guy is fully himself—whether it's a basement, a garage, or a corner of his home. It's where he surrounds himself with what he truly values, no pretense.

INOX takes that idea and builds jewelry, marketing, and experiences that resonate the same way. We create for men who know what they like, and we offer pieces that feel like they belong in that space—authentic, meaningful, and built to connect with who they are.

HIGH ROLLER

For years, guys had to compromise: pavé stones that pop out, prong settings on brass metals that feel cheap, or oversized steel cubans that never hit the sweet spot. The right size, the right feel, and the right quality always meant paying gold prices.

High Roller Cubans change that. CNC-set (true prong) stones, stainless steel weight, and an 8mm width that finally makes iced-out Cubans wearable every day. Full shine, full weight, built to last —without the mortgage.

COLLECTION HIGHLIGHTS

- 8mm iced-out Miami Cubans — slimmer profile, built to wear every day.
- Stainless Steel PVD with precision-set CZ stones, CNC-set (true prong setting, not glued pavé).
- Double-tab box clasp for secure, engineered closure.
- Full weight and feel of fine jewelry, without bullion prices.
- Available in Steel, 18kt Gold IP, and Black IP finishes.
- Offered as matching necklace + bracelet gift sets.

BLACK SHEEP — BLACK SPINEL

NOT BORN TO FOLLOW

The Rebel

Not everyone's meant to fit in. Black Sheep takes the High Roller formula and drags it into darker territory — matte black steel, CNC-set black spinels, and a finish that feels more underground than uptown. Built for the guy who leads without asking permission.

The Assassin

Mamba moves different. Matte gunmetal steel gives this High Roller signature a colder, sharper feel — sleek, precise, and built with quiet intensity. Less spotlight. More calculated danger.

JAGUAR

The Predator

Jaguar represents controlled power. Matte gold steel meets black spinels in a combination that feels expensive without trying too hard. Fast, calculated, and impossible to ignore, this is the High Roller signature for the man who prefers presence over noise.

Guaranteed to turn heads... most of the time.

THE
KRAKEN
BLACK SAPPHIRE

The third entry in INOX's Pantheon, inspired by Poseidon's legendary steed (Hippocampus) and the call of the open sea. Featuring a sleek matte curb chain with deep ocean-blue accents and black sapphires, OceanSteed represents mastery through motion—movement, exploration, and command of one's course.

SR-71
DIAMOND CUT

This one goes
Mach 3!

Inspired by the SR-71 Blackbird—the fastest air-breathing aircraft ever built—this collection channels the peak of Cold War engineering. Designed to fly at Mach 3.0, the Blackbird required radical solutions: beveled leading edges to survive extreme heat, a pitch-black matte finish for reconnaissance, and a titanium alloy that could endure what steel and aluminum could not. The SR-71 Diamond Cut Collection translates those same principles into men's jewelry built for speed, stealth, and over-engineered confidence.

- ▶ TA-2 titanium construction inspired by aerospace alloys
- ▶ Diamond-cut, beveled links echoing the Blackbird's leading edge
- ▶ Reconnaissance black matte finish
- ▶ INOX tactical trigger-style clasp

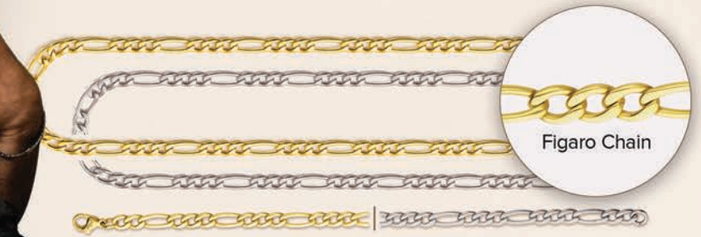

Cleared for takeoff.

QUANTUM

THE SUPERCONDUCTOR RING

These rings are not just crafted, they are harnessed from the very essence of energy itself!

Each one of our Quantum rings is carved out of the core of a Niobium-Titanium Cable core encased in copper. These Superconductors cables are capable of carrying high voltages of electricity with zero resistance once cooled to extremely low temperatures driven by the principles of Quantum Mechanics, making them conduits to limitless power and style.

Est. 1776

COLLECTIONS

Celebrate 250 years of Life, Liberty, and the Pursuit of Happiness

1776 is built on identity, not moments — rooted in the founding year and carried through subtle, wearable design. At its center is Yankee Doodle, a real Revolutionary figure from Norwalk, Connecticut, the same ground INOX stands on today. From Fitch Street to the battlefield, this collection connects directly to that history, using hidden flag details and subtle symbolism to turn familiar icons into something personal — everyday pride you can rock.
